## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-22, 24, and 26-41, drawn to a bound microparticle and encased microparticles having an absorbable polymer and a peptide.

Group II, claim(s) 23, drawn to a microparticle with gel-forming liquid polyester.

Group III, claim(s) 25, drawn to an encased microparticles with gel-forming liquid polyester.

Group IV, claim(s) 42-46, drawn to a method for making encase microparticles.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The Groups appear to be linked by the technical feature of the bound microparticle. However this composition is known in the prior art (e.g., WO 92/11844). Thus the linking technical feature is not a contribution over the prior art. Each of the Groups has a technical feature as given above, which is not required for the other Groups.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
